

Handle style and colour choices with APMG

APMG offers an extensive variety of handles to complement, customise and add impact to your laboratory and educational furniture. Choose from inset, bow and bar styles to extruded aluminium profile and specialist models such as anti-ligature handles.

With our own paint shop on site we offer a selection of colours and finishes that can reflect your corporate or school branding or simply introduce a pop of colour to your design. Just speak to us – we're design experts.

To help you make your choice here is a small selection of our most popular handle styles.

Stainless Steel D Handle
96 mm centre & 128 mm centre

Stainless Steel D Bow
160mm centre

Matt Nickel Lay On

Matt Nickel Finish Inset

APMG recommends brushed metal finish handles are not powder coated as they can chip.

Choose your colours

We can colour match our extruded aluminium handles - and many of our other handles – using a tough polyester powder coating.

For a smooth, contemporary matt finish we can also anodise our extruded handles in any colour.

Contact our friendly team to discuss the handle options for your project.
